

Polycom VVX D60 Wireless Handset

Why DECT phones

- “ DECT phones are the standard in most businesses
- “ DECT solutions provide users the ability to freely walk about the business or within a designated perimeter of the base unit and have use of the phone without being tethered to a location by cords or wires
- “ Beyond these basic features, there are other features to look for when selecting a cordless solution

Why Are DECT Handsets Important?

“ On-site mobility to reduce lost calls and provide the capacity to respond to your customer requests

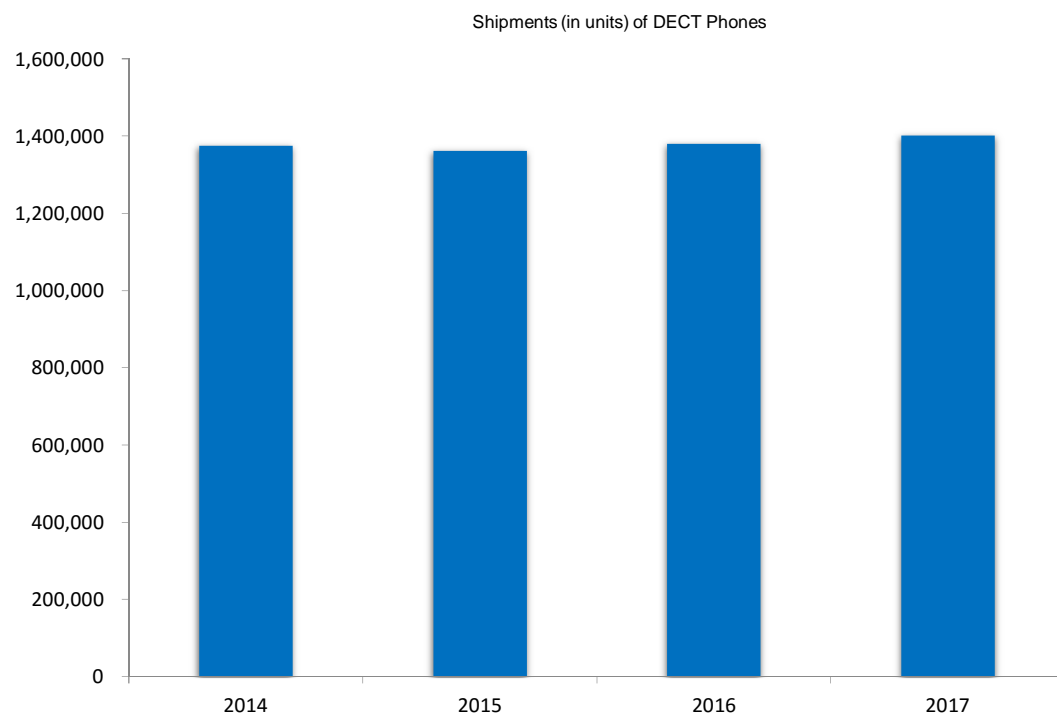

Need an excellent voice quality and business telephony features throughout the workplace contributing to improved user responsiveness

Need enhanced usability to optimize business calls with a full range of calling features

Enterprise DECT Phone Market Trends

Market Overview

DECT Phone shipments is expected to grow by ~1.4% and ~1.6% in 2016 and 2017

Source: Frost & Sullivan 2015

Let's take a closer look .

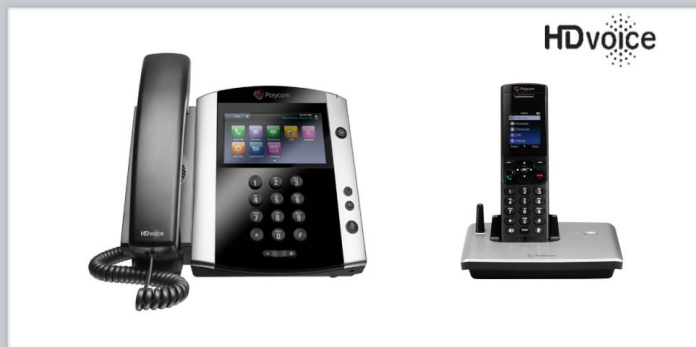

Features

Polycom VVX D60 Wireless Handset

Product Overview

- A scalable SIP-based DECT solution:
 - DECT handset
 - Base station enabling increased productivity and mobility
- DECT Base Station paired over Ethernet to VVX
- Provisioning and Management through host VVX phone via Ethernet

Features

- Range: 50m(165ft) indoor / 300m(980ft) outdoor
- 2+TFT (178x220) color display with LCD backlit
- 10/100 POE Base station with Pass-through
- DECT 1.92GHz - 1.93GHz(US), 1.88GHz-1.90GHz(EU)
- 10 hours talk time, 100 hours standby
- Wall mountable
- Belt clip available
- Dedicated 2.5 mm headsets port (ext 2.5mm to 3.5mm adapter)
- Support for 4 simultaneous calls
- Support for up to 5 DECT handsets

Polycom VVX D60 Wireless Handset

Benefits

Seamless call management on-the-go+

Freedom to take your conversation wherever you go

Polycom VVX D60 Pairing Mechanisms

Pairing Option	Description
PC Port auto Pairing	The VVX monitors any connection event on the PC port for a DECT Base Station. This is done by sending out a discovery message on the PC port. On receipt of response to the discovery message, the VVX initiates SSH tunneling and a DECT handshake automatically. This does not require any user input
Automatic Discovery and Pairing	This mechanism automatically discovers available DECT Base Stations on the network and displays them through the VVX phone / Web UI. The precondition for automatic discovery of DECT Base stations is that they need to be in same subnet. This provides flexibility to select the desired DECT Base Station to be paired with VVX.
Manual Pairing	This option allows manual configuration of the IP address of the DECT Base Station to pair. The VVX initiates SSH tunneling to the given DECT Base Station IP address by sharing a unique identifier

In Summaryõ Why Polycom VVX D60?

- “ A scalable, cordless , on premise, SIP-based mobility solution
- “ Easy to use with advanced business features
- “ HD voice
- “ Seamless call management while %on-the-go+
- “ Leverages previous IT infrastructure investments
- “ Flexible and future-proof
- “ Best-in-class service and support

- Support Community

The screenshot displays two parts of the Polycom support ecosystem. The top portion shows the 'Polycom | Support' website with a search bar containing 'VXX 500'. The search results show two entries for 'Polycom @ VXX @ 500', each with a brief description of the knowledge base content. The bottom portion shows the 'The Polycom Community' forum page, which includes a welcome message, a list of 'Top Kudoed Posts' (e.g., 'Re: Disable Polycom web interface'), 'Top Tags' (e.g., 'Alcatel anaet', 'Avaya Cisco'), and 'Top Kudoed Authors' (e.g., 'Polycom', 'StaffenBaierUK'). A table at the bottom lists forum categories like 'Voice (4 Items)', 'PSTN', 'VoIP', and 'DECT' with their respective post counts.
