Description:

The Telemetrics CP-ITV-VC4 is an RS-232 serial desktop control panel designed to control the Canon VC-C3 and VC-C4 pan/tilt video cameras. Up to four camera systems can be connected and controlled by one control panel.

A proportional rate joystick provides smooth, simultaneous control of pan and tilt. Switches are provided to control zoom, focus and iris of the camera lens. Six memorized presets, pan, tilt, zoom and focus positions, for each of the four cameras can be recalled by selector switches provided or by external contact closures (option). Interacting local and remote control panels, RS-232 interconnected, can control the cameras at either location by selecting the front panel Local/Remote switch. RS-232 addressable external video switchers are also controllable when operating camera select buttons.

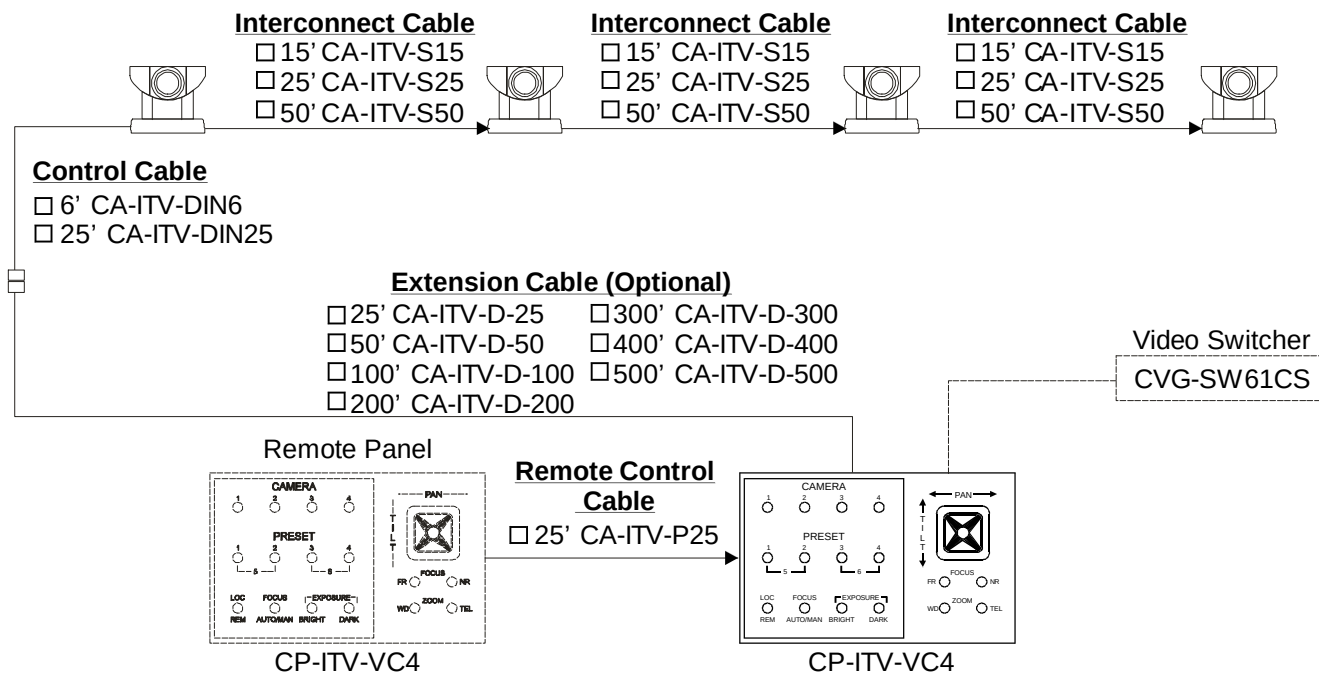

The pan/tilt video cameras may be connected using daisy chain wiring or home run wiring. Various interconnecting cable accessories are available (not included).

Other accessories include a ceiling mounting bracket (CAM-CMBKT) and a wall mounting bracket (CAM-WMBKT).

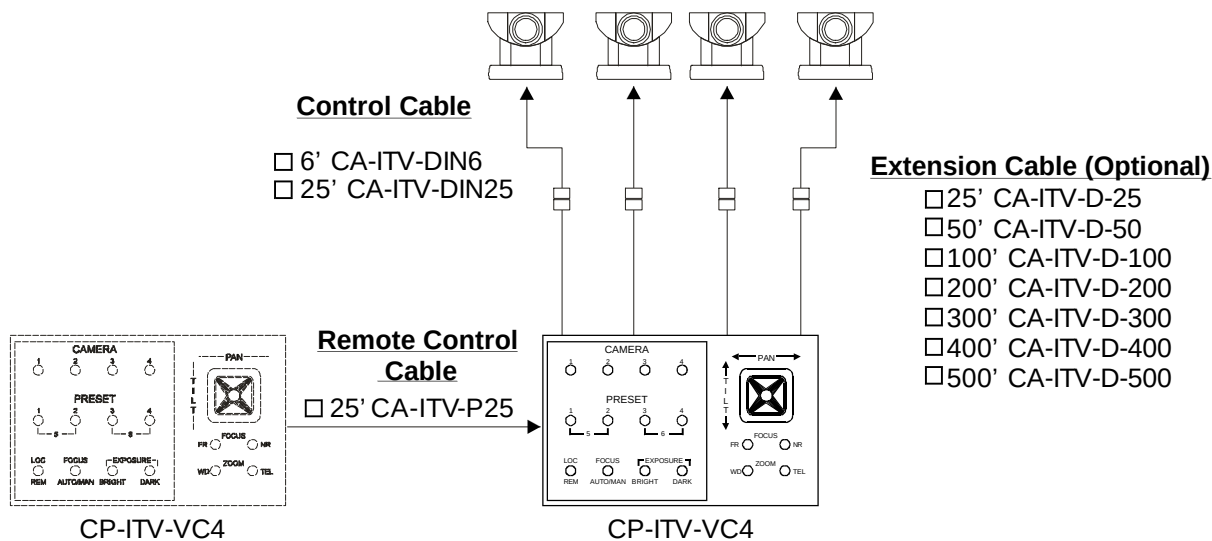

Functions:

- ▶ Four Pan/Tilt Camera Select Switches
- ▶ Six Preset Shot Switches
- ▶ Local/Remote Select
- ▶ Proportional Joystick for control of pan and tilt
- ▶ Lens Zoom Wide/Tele
- ▶ Lens Focus Far/Near
- ▶ Lens Focus Auto/Man
- ▶ Video Switcher (Daisy Chain Only)
(Comprehensive 6 x 1 Switcher - CVG-SW61CS)

System with Daisy Chain Wiring

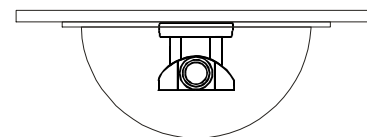

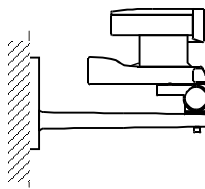

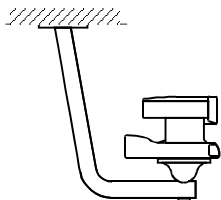

System with Home Run Wiring

Mounting Brackets

☐ Ceiling Mounting Bracket CAM-CMBKT

☐ Wall Mounting Bracket CAM-WMBKT

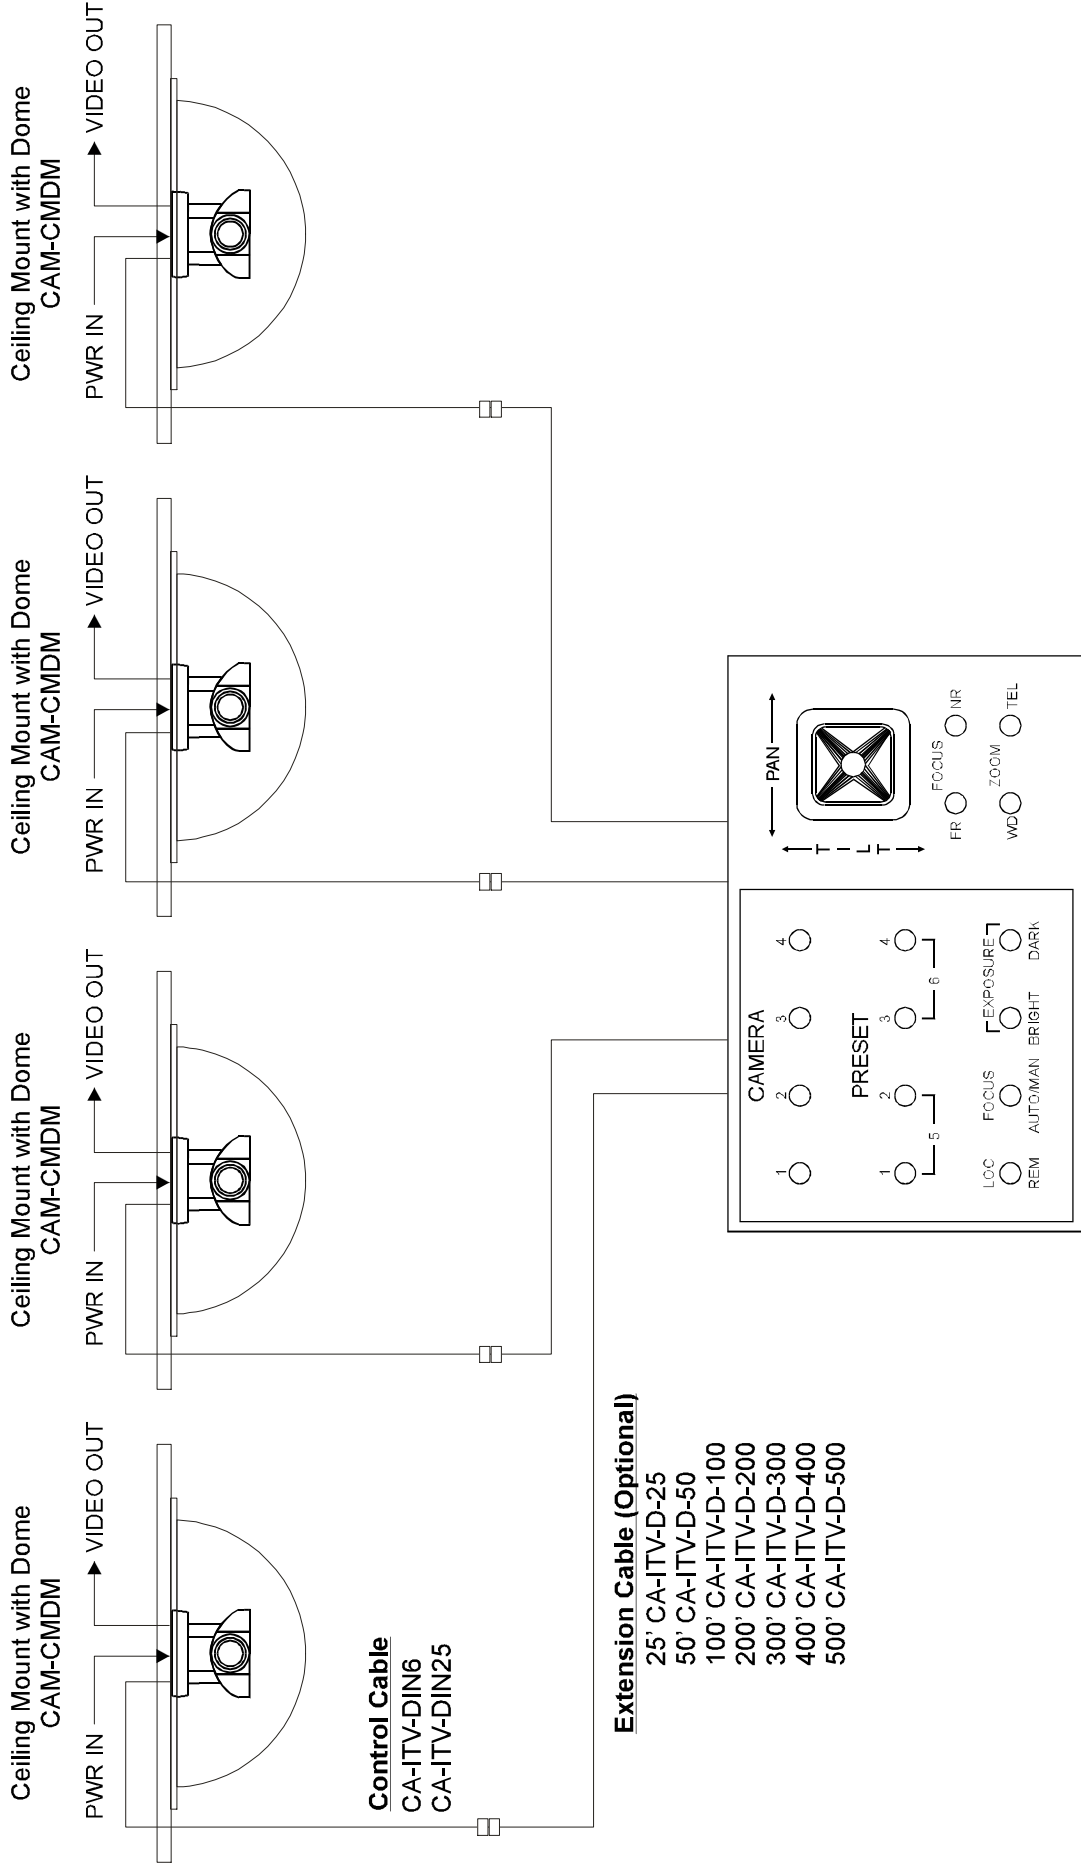

☐ Ceiling Mount with Dome CAM-CMDM
