

PCS-XG Series

Recording Data Size

The table below shows used space (per an hour) when the video/audio data is saved in the Memory Stick, using the recording function of the PCS-XG series.

For measurement, a sample source was used for recording.
As data size varies according to the source, please use the following values as a rough guide only.

Video Rate Setting(*1)	512kbps	384kbps	128kbps	64kbps	Off (Audio only)
Used Space/H	255MB	222MB	114MB	96MB	34MB

*1: Make a setting under Administrator Setup Menu -> Streaming/Recording -> Video.
